SUMMARY

Enthusiastic and detail-oriented frontend developer with a strong foundation in ReactJS, JavaScript, HTML, CSS, and Tailwind CSS. Passionate about building responsive, user-friendly web applications with a focus on clean UI/UX design. Proficient in version control using Git/GitHub and familiar with Node.js and Express.js for backend integration. Strong problem-solving skills with a continuous learning mindset, eager to contribute innovative solutions to a dynamic development team.

EDUCATION

Bachelor of Technology (C.S.E)

- St. Andrews Institute of Technology and Management, Gurugram, India

Aug 2019 - Jun 2023

Intermediate (C.B.S.E)

- Deep Public School, Delhi, India

Mar 2017 - May 2019

PROJECTS

Note App (React + Routes, CRUD Operations) ([LINK](#))

- Built a responsive notes app to create and delete notes with a clean UI.
- Used React Hooks for state management and local storage for data persistence.
- Styled with Tailwind CSS for a modern, mobile-friendly design.

Text Translator App (React + RapidAPI) ([LINK](#))

- Developed a real-time text translation app using RapidAPI.
- Integrated multiple language support and React state management for seamless UI updates.
- Styled with Tailwind CSS for a clean, user-friendly design.

Weather App (React + OpenWeather API) ([LINK](#))

- Built a weather forecasting app that fetches real-time weather data from OpenWeather API.
- Displayed temperature, humidity, and wind speed in an easy-to-read UI.
- Implemented error handling for incorrect city inputs.

News App (React + Vite, API Integration) ([LINK](#))

- Built a news aggregator app that fetches real-time news using an API.
- Implemented category-based news filtering and an optimized UI for better readability.
- Used React Hooks (useEffect, useState) to manage API calls efficiently.

Amazon Clone (HTML + CSS + JS) ([LINK](#))

- Built a fully responsive clone of Amazon's user interface.
- The project replicates the core design and layout of amazon homepage, product listing, details, cart.
- Used pure html, css and javascript.

SKILLS

- Technologies:** Html, CSS, JavaScript, Tailwind, React.js, Redux, Api, Node.js, Express.js, MongoDB
- Developer Tools:** Git, GitHub, VSCode
- Languages:** C#
